

### **RIDDOR: Million hour milestone reached**

The MHA Framework Community Board members celebrated reaching a major health and safety milestone when 1,000,000 hours of work was completed since the last the last Reporting of Injuries, Diseases and Dangerous Occurrences Regulations (RIDDOR).

MHA Manager, Peter Barclay, commended all partners involved for their efforts to keep workers safe during the various MSF2 projects involved:

Peter said: “It is good to see rigorous levels of health and safety have been maintained across all our MSF2 projects to achieve this milestone of a million hours since an incident has been reported.

“Hopefully this level of safety will continue through to the conclusion of our MSF2 projects and beyond as the new MSF3 projects begin.”
